

## Ion Beam Scientist

We are looking for a scientist to join our ion beam science team within the National Isotope Centre Group, GNS Science, Lower Hutt, New Zealand. This role will involve the application of ion beam technology to the research and development of new materials and the transference of ion beam technologies to the environmental, geoscience, agricultural and high value manufacturing sectors. The successful applicant will contribute to both scientific research and science consultancy projects. You will contribute to the development of new ion beam technology applications at GNS Science in partnership with the MacDiarmid Institute of Advanced Materials and Nanotechnology and the New Zealand manufacturing network "Materials accelerator" led by the University of Auckland.

Details can be found in <https://vacancies.gns.cri.nz/>

Best Regards  
John K
